

ODC24 Information Package

The Next Normal : Living with Organoids

Greetings

Organoid Developer Conference Committee

It is with great pleasure that we extend our official invitation to you on behalf of the Organoid Developer Conference Committee.

Since its inception in 2018, ORGANOIDSCIENCES has been at the forefront of hosting the annual Organoid Symposium an event dedicated to amplifying the reach and significance of research concerning the utility of organoids with last year's ODC23 transforming into a global symposium. With the presentations of highly esteemed global organoid experts, the event consisted of over 700 participants and sponsorships from 22 highly reputable institutions allowing ODC to evolve into a renowned, global symposium, representing the forefront of organoid research and development.

ORGANOIDSCIENCES is delighted to announce its upcoming organoid symposium, ODC24 'The Next Normal: Living With Organoids,' which is scheduled to take place at CHA Bio Complex & VINMEC International Hospital on April 25th, 2024. It will be managed by the newly formed ODC committee, transforming it into a large-scale global event. We would like to extend our warm welcome to all of the attendees and participants.

This event anticipates a significant turnout exceeding over 1,200 attendees, and will be simultaneously held in both South Korea and Vietnam. With the incorporation and reinforcement of alternative animal testing methods, stemming from the 2023 National Advanced Strategic Technology, it is poised to become the largest event of its kind, garnering increased global attention.

The event's structure transcends the academic realm, encompassing instances of organoid commercialization, biotech investor relations, and other related fields. The success of ODC is reliant on the many brilliant minds that have helped shape its success, and we would like to continue to promote and expand its potential through your participation.

Vietnam's VINMEC International Hospital has also provided various programs and event promotions, and anticipates over 700 Korean researchers, 300 Vietnamese researchers, and more than 200 related organizations and industry figures to be in attendance. Upon your participation, your dedicated research efforts will be displayed and promoted on a global stage. In order to promote the everlasting growth and development of the organoid sector and the establishment of a healthy ecosystem, we would like to kindly ask for your participation in this year's ODC24 'The Next Normal: Living With Organoids'. On behalf of the Organoid Developer Committee, we would like to sincerely thank you for your continued support.

[KR] Program

Time	Sessions	Program
09:30	01	<p>Organoids Unleashed : Closer to Artificial Organs</p> <p>This session will specifically focus on the application of organoids in regenerative medicine and potentially in artificial organs. It will delve into how organoid technology is creating new possibilities in these areas, particularly in organ repair and replacement. The session will discuss the latest advancements in developing complex organoid structures, address ethical considerations, and explore how commercialization might help solve organ shortages.</p> <hr/> <p>[Chair] Inbo Han CHA University, CHA Bundang Medical Center, Neurosurgery</p> <p>Robert Coppes, University Medical Center Groningen Ryuichi Okamoto, Tokyo Medical and Dental University Xiling Shen, Terasaki Institute Kyungjin Lee, ORGANOIDSCIENCES</p>
11:20	02	<p>Unveiling the Future of Science : Innovation Tech</p> <p>In this session, we will delve into the unexpected and groundbreaking uses of organoids, sparking curiosity and amazement. The aim is to challenge perceptions and expand the audience's understanding of what organoids can do. This will include discussions on the most surprising and innovative applications of organoids in various fields of science and technology, showcasing their versatility beyond traditional expectations.</p> <hr/> <p>[Chair] Bon-Kyoung Koo Institute for Basic Science</p> <p>Ramanuj DasGupta, Genome Institute of Singapore, A*STAR Jun Wu, UT Southwestern, Department of Molecular Biology Lena Smirnova, Johns Hopkins University YongKeun (Paul) Park, Tomocube, Inc. Kunyoo Shin, Seoul National University</p>
14:20	03	<p>Respecting Life : Animal-free Solution</p> <p>In this session, we examine the efforts to replace the use of animals and animal-derived ingredients in our surroundings. We will explore topics such as cultured meat/alternative protein in the food industry, as well as efforts to replace animal testing in fields such as cosmetics, chemicals, and pharmaceuticals.</p> <hr/> <p>[Chair] Il-Ung Oh Ministry of Food and Drug Safety</p> <p>Borami Seo, Humane Society International/Korea Won-Jeoung Park, Lush Korea Sudeep Joshi, The Francis Crick Institute and King's College, London Sanghee Park, Chemtopia Co., Ltd Hyo-Jung Yoon, Food & Nutrition Technology Business Unit, CJ CheilJedang André Gerth, Lambda Biologics GmbH</p>
15:50	04	<p>From Lab to Life : Real-World Innovations</p> <p>This session will concentrate on real-world examples where organoids have been successfully utilized in development and research. It will cover case studies demonstrating the practical application of organoids in drug testing, disease modeling, and personalized medicine. The focus will be on showcasing how organoids have bridged the gap between laboratory research and tangible, impactful solutions in various domains of healthcare and scientific research.</p> <hr/> <p>[Chair] Mi-Young Son Korea Research Institute of Bioscience and Biotechnology, KRIBB</p> <p>Seoyeon Kyung, COSMAX BTI Yong Kyun Kim, Catholic University of Korea, College of Medicine Hyang-Ae Lee, Korea Institute of Toxicology Brett J. Kagan, Cortical Labs Siyoung Lee, Geninus, Inc. HongSeok Choi, Abion Inc. Jongsuk Chung, Gencurix Inc. Hyung Joon PARK, Grassmedi</p>

[VN] Program

Time	Sessions	Program
09:00	01	<p>Organoid-based Technologies: Application across diverse research areas</p> <p>In this session we will specifically focus on the application of organoids across various research projects. We will delve into how organoid technologies are creating new possibilities, particularly in drug evaluation. The session will discuss the latest advancements in using organoids for advanced research.</p>
	Location Auditorium-1/2	<p>[Chair] Xuan-Hung Nguyen Director, Hi-Tech Center(HTC), Vinmec</p> <p>Bo Eun Lee, VOS Discovery Somponnat Sampattavanich, Siriraj Hospital, Mahidol University Tran Ngoc Quyen, VAST_INSTITUTE OF APPLIED MATERIALS SCIENCE</p>
11:00	02	<p>Research Collaboration: Share and discuss the latest advancements in research</p> <p>In this session, we will focus on the research & development of each institute and their current stage of development. The goal is to challenge perceptions and broaden the audience's understanding of diverse research. This will involve discussions on the most innovative scientific approaches across various fields of science and technology.</p>
	Location Auditorium-1/2	<p>[Chair] Somponnat Sampattavanich Siriraj Hospital, Mahidol University</p> <p>Quoc-Viet Le, Ton Duc Thang University Punn Augsornworawat, Siriraj Hospital, Mahidol University Vu Minh Thiet, Nguyen Tat Thanh University Xuan-Hung Nguyen, Hi-Tech Center of Vinmec</p>
13:50	03	<p>Poster session Oral presentation of the poster session</p>
	Location Auditorium-2
